## Available in 115 and 175 U.S. Gallon/435 and 662 Litre Models

Rheem-Ruud commercial storage tanks are vertical tanks designed for applications that require large quantities of hot water in short periods of time. When used in tandem with Rheem-Ruud commercial water heating equipment, these storage tanks provide the flexibility needed for many Commercial applications. Installed individually, or in parallel manifold, these storage tanks can provide $80 \%$ draw capability without an appreciable temperature decrease in single temperature applications.

## Construction Features:

- Long life tank design proprietary steel formulation with two coats of high temperature porcelain enamel to maximize corrosion resistance resulting in a superior tank design. Two heavy duty magnesium anode rods are installed for longer tank life.
- Space saving design unlike other storage tanks, the ST120 can pass through a 30" opening and the ST175 only requires a 33" opening - ideal for boiler room doors.
- Efficient design 2" of rigid polyurethane foam insulation provides superior insulating qualities resulting in reduced operating costs. Our patented process of injecting foam into the insulating cavity adds additional durability and toughness to the baked enamel steel outer jacket.
- Tank openings circulating line connections and hot outlet are 2" NPT on the ST120 and 2-1/2" NPT on the ST175. Other openings are provided for relief valve and temperature control.
ST175A equipped with a hand-hole cleanout.
- Factory manifold kits factory kits are available for the ST120 model. Copper sweat fittings and tubing are precut and packaged at the factory. Each component is identified for ease of assembly and installation. This method will assure that multiple tanks ( 2,3 or 4 ) will perform as a single unit and give the advantage of extreme flexibility.

## Certifications and Ratings:

- Efficiency - these models comply with ASHRAE 90.1b-1992 (Part of the Federally mandated Energy Policy Act (EPact).

DIMENSIONAL INFORMATION (All dimensions shown in English and Metric)

| MODEL NUMBER | UNITS | A | B | C | D | WATER CONNECTIONS |  | APPROXIMATE SHIPPING WEIGHT |  |

|  |  |  | 1034 kPa | 1034 kPa |

## Recommended Specifications:

Storage Tank(s) shall be model $\qquad$ , manufactured by RHEEM-RUUD. Storage Tank(s) shall have a storage capacity of $\qquad$ gallons. Tank(s) interior shall be double coated with a high temperature porcelain enamel and furnished with two magnesium anode rods rigidly supported. Storage Tank(s) shall exceed the efficiency requirement of ASHRAE Standard 90.1b-2001. Tank(s) shall have a working pressure rating of $\ldots$ psi, and shall be completely assembled. Tank(s) shall be insulated with 2" of rigid polyurethane foam insulation. Storage Tank(s) shall be covered by a five year limited warranty against tank leaks.

## ADD FOR ASME CONSTRUCTION

Storage Tank(s) shall be constructed in accordance with the requirements of the ASME Boiler Pressure Vessel Code, Section IV Part HLW.

## Limited Warranty

This product features a five year limited warranty against tank leaks. Please refer to Commercial Warranty Information brochure for complete warranty information.
